Product: Front Mounted Child Bike Seat

Price: £49.99

Stockist: www.toysrus.com

Little children on adult bikes are more often than not resigned to a seat at the back, or harnessed in a trailer. This excellent and highly recommended seat puts the child out in front, albeit protected by his parent's embrace. Once in position, they get to see exactly what the rider sees. The seat has a safety harness, headrest and adjustable footrest which 'grows' with the child.
